VOLUME 18, ISSUE 1

BRUCE PENINSULA STONE LTD.

NEWSLETTER APRIL 2026

RAIN AND MORE RAIN

The new season has commenced; unfortunately, recent weather conditions have not been favourable. Persistent rainfall has resulted in flooding challenges, causing a temporary halt in block marble extraction. All our facilities remain fully operational, and we continue to accept orders, though production of block marble will be delayed until May. Other products will be manufactured as usual at all three locations. With the onset of warmer and drier weather, production is expected to resume at full capacity.

WHAT'S IN STOCK?
