BRUCE PENINSULA STONE LTD.

VOLUME 18, ISSUE 4

JULY NEWSLETTER

IT'S HAMMER TIME!

Please be advised that, due to increased order volume and an unforeseen equipment issue, certain production timelines will be impacted. The primary hammer utilized for the extraction of thick armour beds is currently out of service, as the excavator on which it is mounted to requires replacement parts that have been ordered. Accordingly, availability of certain armour layers will be delayed until next month. Following the return of the equipment in service, few weeks of extraction work are expected to be required in order to address existing back orders. During the current month, we anticipate accessing the following layers: 12–14", 18–20", 22–24", and 28–30" in 3-deck-wide, flat, stackable size.

WHAT'S IN STOCK

6 x 8, 8 x 8 sawn wallstone, 1 – 1 ½" flagstone
2-3", 3-4" oversize flagstone pebble top
6-7", 10-12", 12-14" small, skidded armour stone

FUN FACT ABOUT CANADA

LAND OF LAKES Canada holds more natural lakes than the rest of the world combined.

LONGEST COASTLINE boasts the longest coastline in the world, stretching over 202,000 km across the Atlantic, Pacific and Arctic oceans.

EMPTY SPACES Despite being the second-largest country in the world by landmass, only about 10% of Canada's land is inhabited.
