Bruce Peninsula Stone Ltd.

VOLUME 18, ISSUE 6

PLAN AHEAD FOR WINTER

With our season ending in early December, ordering now is the best way to secure the stone you need for winter jobs, upcoming contracts, and an early start on spring projects.
Not sure which material is right for your project?
Contact Eric for current stock details, upcoming production schedules, and recommendations for your winter or early spring needs.
Order early for the best selection.
Advance orders help us reserve your material, schedule production, and have your stone ready before our seasonal shutdown in December.

BACK-TO-SCHOOL SAFETY

With students returning on September 8, please slow down in school zones, avoid distractions, watch for children walking or cycling, and stop for school buses when red lights are flashing and the stop arm is extended.

Check our stock list!!
Contact Eric today!
If an item is not currently available, an early order gives us the best opportunity to have it ready before the December shutdown.

IN STOCK NOW

- 3–4” and 5–6” pebble-top slabs
- 7–8” and 10–12” small armour, skidded
- 1–2” and 3–4” pebble-top oversize
- 5–6” pebble-top garden steps
- 2–3” large smooth oversize
- 2–10 × 4” mixed-rise buff building stone
- 1–1.5” pebble-top flagstone
- Cleft building stone: 2¼”, 5”, 7¾”, and 10½”
- 1–1.5” and 1.5–2” smooth flagstone
- 6 × 8” and 8 × 8” split-face grey sawn wallstone

QUARRY PRODUCTION

Wiarton Quarry will be cutting 2¼” and 6” oversize from block marble on the gantry and wire saws. Some grey block will be run through, making 3” oversize and 9” garden steps. The small saws will be cutting cleft building stone and 24” coping.
The guillotine will be splitting the basal layer from the Wiarton Quarry material in 2–10 × 4” mixed rise, 2–6 × 4”, and 6–10 × 4”. Guillotine drywall in 4–5 × 8” and 9–10 × 8” will be split as well.
Mar Quarry is extracting armour stone in 12–14” for flat-deck and skidded orders, plus 24–26” and 28–30” three-deck-wide stone. A pebble-top 2–3” large slab and oversize layer will also be extracted.
This layer is tight and very solid; it is one of the nicest slab and oversize layers at Mar Quarry. Stock will include 1–2” oversize and 1–1.5” pebble-top oversize and flagstone.
Georgian Bluffs Quarry will be extracting oversize in 1–2” and 2–3” smooth material, in small, medium, and large sizes. There is lots of medium and large 2–3” material in stock.
Random flagstone is coming out steadily in ¾–1”, 1–1.5”, and 1.5–2” thicknesses in A-grade material. We have produced a large amount of 1.5–2” this year.
It will be our best year for thicker oversize and flagstone production. The area we are quarrying in Phase 2 has turned out amazing.
